

Change the game of house-touring!

High expenses in renting industry

1. Visiting to examine houses

Time consuming for both customers & home-dealers

2. Expenditure of hiring dealers

Companies need to hire dealers to contact customers

IOT + AR

increase the efficiency of house-touring

RTC-Platform

Programmable API + Hardware Design

Our Partners

1. Hardware Providers

Access to affordable HW devices that fits to the criteria of our unique HW Design

2. Web-Server Provider

Access to reliable server that can stream real-time video without deploys

What makes us different?

VS

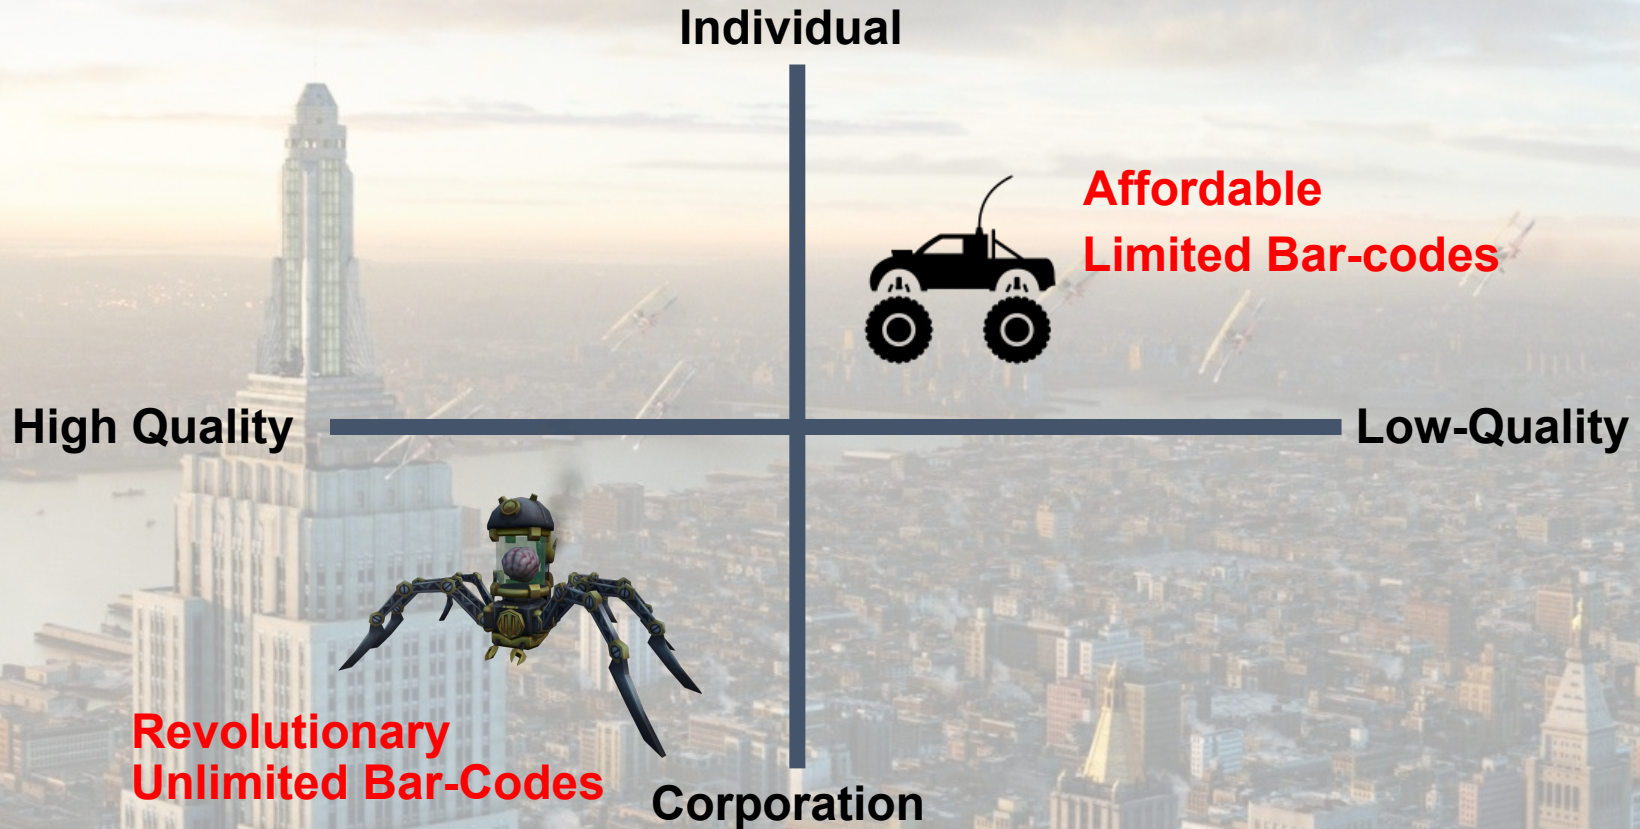

No Install!

Easy for customers to gain access to the virtual-house tour.

Unlike Skype and Adobe connection, the users don't need to spend time on installing the software or the firmware in their computer

Segmentation

Channels

1. Individuals

Access to Website in order to
purchase our service
ex) private land-owners

2. Corporation

Send proposals to contact with
the corporation which are
interested in our product
ex) Wolff Corporate Housing
